Our Knowledge Leaders Drive Best-Practice Solutions

OccuCare maintains a product advisory board of nationally and internationally recognized knowledge leaders in the field of occupational health, safety and medicine. The board is an important forum for the exchange and free flow of ideas that will help OccuCare remain the leading provider of OHS software.

The team regularly reviews and shares information to upgrade product from various source like clinical and regulatory literature, government guidelines and industry updates.

Smooth Implementation & Continuous Support

OccuCare provides comprehensive support and services far beyond implementation. We have established support service levels and response times to meet our client's expectations and ensure effective communication.

Occupational health services can optimize the software features and funtions for the most efficient operation of workforce health and safety management.

OccuCare Set the Standard for Innovation.

We are dedicated to continuously improving how the industry manages occupational health, safety and wellness. With a solid core management team with wide experience, OccuCare continues to release innovative tools with workflow driven processes that not only saves your money but also saves your time to focus on the quality care that you provide.

Healthy employees make a healthy company

"I am now able to truly devote my time to employee health and wellness, analyzing reports and really digging into the areas of concern. I am no longer sorting and updating data from different logs for compliance and other reporting needs."
